
Source lines
K562, RPE1 (and HepG2)
Predictor
(any cross-line method)
Target line
Jurkat
controls observed
perturbed observed
Train on source controls + perturbations
+ target controls
Predict target perturbation distribution
input: target controls + pert gene
controls observed
perturbed hidden
evaluated against hidden cells
577 shared perturbations · 6,642 highly-variable genes · target perturbation cells used only at evaluation
